

STEAMING SUGARVEIL ONTO FONDANT

This technique is very simple with a big impact!

1. Once you have covered your cake layers with fondant, prepare sheets of SugarVeil in the [Grasses Confectioner's Mat](#) and allow to set (in this instance, we used [Extra Dark Chocolate SugarVeil Confectionery Icing](#)).
2. Peel from the Mat then spread the Grasses sheet onto the cake tiers.
3. Arrange the strands as you like and then steam them. Apply steam via a tea kettle or clothes steamer and simply press the strings into the fondant.
4. Continue to drape the strings the way you like them and apply steam.

Tip: Embellish with a [Rose Mantilla bow](#)!
