

## PATENT LEATHER LOOK

Use SugarVeil's glossy side for a brilliant patent leather, and the [mosaic technique](#) to create interesting textural finishes on modeling chocolate!

A "patent leather" bow is created by making [SugarVeil Icing](#) "fabric" on the back of any Confectioners' Mat. One side of the "fabric" will be matte, one side will be glossy - like patent leather.

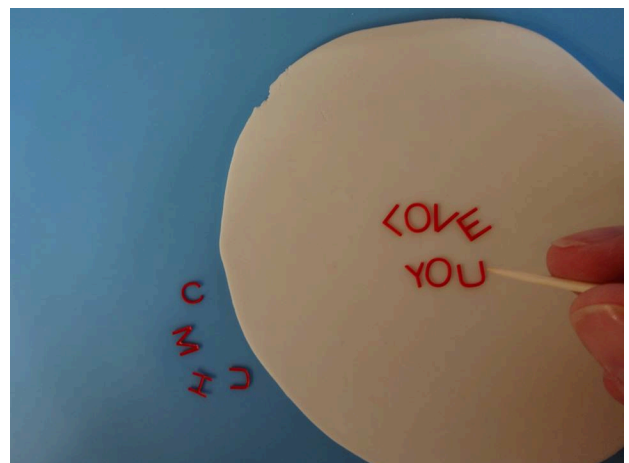

SugarVeil [Brooch](#) and [Bow](#) trimmed with edging from the [Mesh Confectioners' Mat](#).

To make the heart tag, allow letters from the [Celebration Ribbons Mat](#) to dry and peel mat back to remove letters.

Use a toothpick to re-arrange SugarVeil letters in desired words and roll into fondant.

Cut out heart. (We used a ravioli cutter.)

Use the [mosaic technique](#): using dried [SugarVeil Icing](#) pressed into modeling chocolate. Then top with a “patent leather” bow by making SugarVeil “fabric” on the back of any Confectioners’ Mat. One side will be matte, while the other will be as glossy as patent leather.
